PROFESSIONAL SUMMARY

Versatile Full-Stack Developer with 4 years of experience building feature-rich web applications. Skilled in developing reusable, dynamic UI components and architecting complex multi-layered backend systems. Experienced in Scrum and Kanban, with a strong commitment to clean code, performance optimization, and continuous improvement.

SKILLS

Programming Languages: TypeScript, JavaScript, SQL, Java, JSX, CSS, HTML, Liquid, PHP, XML, C, Python
Technologies: React, Next.js, Node.js, Koa, Express, Docker, Jest, Storyblok, Shopify, Vue, Spring Boot, React Native, Expo, Symfony
Tools: Git, Jira, Notion, Azure
Spoken Languages: English (B2), French (B1), German (A1), Arabic (Native)

PROFESSIONAL EXPERIENCE

Klenico   Konekto
Full-Stack Developer   *Jan 2023 - Feb 2024*

- Engineered a Storyblok configurable UI, enabling customizable user flows for various clinic environments.
- Optimized response times by implementing caching mechanisms and dynamic rendering strategies based on content, resulting in at least a 50% reduction in reload times in certain cases, significantly improving overall performance.
- Developed a suite of admin tools to manage clinic operations, alongside visualization tools to monitor key metrics and events.
- Created and maintained unit tests to ensure code reliability and long-term maintainability. Adhering to best testing practices.
- **Tech Stack**: Next, React, Node, Docker, Storyblok, Prisma, TRPC, React Query, Jest

Atlas.ti   Konekto
Full-Stack Developer   *Oct 2022 - Jan 2023*

- Developed an account-specific feature flag system to manage feature releases, enabling seamless deployment and testing of new functionalities.
- Built a storage service leveraging Amazon S3 for scalable and secure data storage and retrieval.
- Implemented a referral system that tracks registrations through a middleware and awards reward points to referrers when purchases are made.
- Developed and executed unit tests for critical features, ensuring robust functionality and minimizing production bugs through comprehensive test coverage.
- **Tech Stack**: React, Node, Koa, Knex, Docker, Jest

Nays   Konekto
Full-Stack Developer   *Feb 2024 - Aug 2024*

- Developed configurable plug-and-play components using Web Components ensuring reusability, flexibility and maintainability
- Created an interactive store locator page with filtering options and map interactivity, using Web Workers to handle operations efficiently and provide a smooth user experience.
- Incorporated Shopify's Metaobjects to allow store additions and referral tracking.
- **Tech Stack**: Liquid, Shopify, Mapbox

EDUCATION

ESPRIT   2018 — 2021
Computer Science (Software Engineering)

IPEIM   2015 — 2018
Engineering Studies
